

EARLY ONSET POLITICAL DISORDER (EOPD) SELF TEST

Does your child exhibit undeveloped self-interest, anti-social behaviors, or discomfort around displays of patriotism? This self-test may help you determine whether he or she suffers from Early Onset Political Disorder EOPD.

My child's favorite color is:

- ✓ Red (Score 0)
- ✓ Blue (Score 1)

My child appears overly concerned with the wellbeing of others.

- ✓ False (Score 0)
- ✓ True (Score 1)

When exposed to a display of patriotism, my child

- ✓ Responds appropriately (Score 0)
- ✓ Acts disrespectful or seems disinterested (Score 1)

My child enjoys playing with:

- ✓ Military-themed toys (Score 0)
- ✓ Dolls (Score 1)

Results:

If you scored **0-1**, congratulations! Your child most likely does not suffer from EOPD.

If you scored **2 or more**, you should seek medical assistance. Keep in mind that while a diagnosis of any genetic disorder can be frightening, early treatment is your best hope for a solution to this damaging affliction.
